THE LANDSCAPE

The auto industry is in transformation: Autonomous vehicles, connectivity, and the shift from internal combustion to electric vehicles.

Fully connected vehicle and volume EV production will amplify demand for transformative individuals in the marketplace.

New battery technology together with 5G communication speed will exponentially accelerate product innovation and change.

The industry's technical knowledge requirements outpace the supply of skilled individuals in the marketplace. Manufacturers must develop new technically capable individuals while there is talent available.

OUR PLAN

BUSINESS TRANSFORMATION

Achieve operational goals, mitigate risk and preserve stakeholder satisfaction.

MANAGEMENT & LEADERSHIP SUPPORT

Clients leverage our experience and expertise to achieve meaningful, measurable results.

OPERATIONAL TURNAROUNDS & PERFORMANCE IMPROVEMENT

Assess and augment current processes to deliver business improvement with rapid operational turnaround.

TECHNICAL & SKILLED CHALLENGES

Fix what needs fixing: product & process engineering, equipment build & integration and skilled trades augmentation.
